

counter top power and flexibility

The VeriFone Omni® 3750 packs all the performance and processing capabilities you need into an ultra-compact dual communication device. This terminal is specifically designed for retail, restaurant, petroleum and QSR businesses, offering terminology-specific prompts for your business with easy-to-install, plug-and-play simplicity that includes an internal PINpad and integrated thermal printer. The Omni 3750 supports a full range of electronic payment options (vertical magnetic-stripe card reader and Contactless/RFID reader) using Chase Paymentech Solutions' advanced communication methods. Dynamic memory allocation improves efficiency and enables multi-application support on a single terminal.

With an ATM-style interface, clam-shell printer and large backlit display, the 3750 simplifies operator training and minimizes costly errors. This, in addition to fast transaction speed and large batch capacity, makes the Omni 3750 a very smart choice.

Communication method options

- Dial-up – fast and affordable connectivity over analog lines with easy installation. Dial back-up also available.
- NetConnect – enables merchants with a broadband connection to process terminal transactions via the Internet.
- IP via Frame Relay and VSAT – continuous, high-speed, direct connection to Chase Paymentech Solutions.

Security features that help protect you against theft and fraud

- Account truncation masking and expiration date suppression on transaction receipts.
- Password protection on sensitive transactions and reports.
- Supports Card Verification Data (CVD).
- Option to validate magnetic stripe information (manually entering last four digits of the embossed card number).
- Ability to lock keyboard access on terminal.
- Tamper-evident casing to resist unauthorized intrusion.

Full tip processing capabilities

- Ability to prompt for a password if tip is greater than a set percentage of the sale.
- Automatic tip percentage inclusion available.
- Option to print three suggested tip percentage amounts on receipt.

more information

For more information on terminals, or any of our payment processing solutions, please contact your account manager or visit www.paymentech.com.

Advanced reporting and training options

- Clerk/Server prompting and reporting.
- Shift processing and reporting.
- Merchant customized or automatic invoice numbers.
- Custom Defined Data (CDD) allows you to include specific transaction data in the reporting files.
- Manual entry indicator on receipts and reports.
- Demo mode lets you practice transactions without affecting real sales.

Enhanced speed and additional capabilities

- Process sales quickly with pre-printing and pre-dialing.
- Debit cash back and surcharge options for transactions.
- Enabled to accept Contactless/RFID card payments.
- High-speed thermal printer that features drop-in paper loading, to virtually eliminate jams.
- Designed for easy upgrades in the future, further protecting your investment.
